Personal Profile

I am a self-motivated and experienced front end web developer from East London. Most of my time is consumed by building front end solutions for mobile devices, desktop browsers and TVs. I am passionate about mobile development and enjoy testing new technologies to deliver best possible experience to the end user. I enjoy delivering new exciting projects within a team or by myself, leading the project from concept through UX to code and pushing live. I enjoy helping more junior developers to introduce to new frameworks or mobile capabilities and their limitations. I have several years of commercial experience in HTML(5), CSS(3), LESS, Sass, jQuery, JavaScript, React Native, PhoneGap, Photoshop, GitHub and Agile. I am renowned for fast HTML, CSS and JS coding, accuracy and attention to detail as well as awesome interpersonal skills and a relaxed temperament.

Skills Summary

HTML(5), XHTML, CSS(3), LESS, Sass, Angular, React Native, JavaScript / jQuery, PHP, MySQL, Wordpress, W3C Standards and Accessibility Aware, Responsive Web Design, Cross browser compatibility, Progressive enhancement, Photoshop, Web Design, GitHub. Able to work in a fast paced environment & complete projects to schedule in an agile team. Proven ability to design, code and build dynamic websites and applications. Designing and creating web services for mobile websites and applications. Can communicate effectively with stakeholders to understand requirements. Ability to explain technical issues clearly to non technical colleagues & clients.

Professional experience

ConnectedSpace.co.uk

React Developer Feb 2016 - June 2017

Part of a JavaScript team that started from scratch with React, when support with React was minimal. Successfully delivered multiple products for both platforms and compatible with numerous screen sizes and os versions.

betway.com

HTML5 Developer May 2013 - Jan 2016

Part of an agile Front End team that deals with Betway logged in users. We built multiple JavaScript services and APIs to serve multiple Angular projects and deliver best possible front end experience for millions of users. Involved in mobile application development using HTML5 solutions and native game development for marketing purposes.

welovemobile.co.uk

Mobile Web Developer Feb 2011 - April 2013

My main responsibility was to develop custom solutions to our mobile projects using HTML, CSS, JavaScript and PHP. Testing our builds after each development sprint on different browsers and different operating systems. Ensure all our projects are compliant with web standards (W3C) and browser compatible. Prototyping mobile solutions and reporting back to Technical Director.
